

Technical Data Sheet:

CMA Fiberglass Paint & Coatings Remover

Description:

CMA's Fiberglass Paint & Coatings Remover is a fast, efficient and economical method of removing all types of finishes from fiberglass surfaces. This nonflammable stripper will remove acrylics, enamels, lacquers, polyurethanes/urethanes, and waterborne coatings while not damaging the gel coat.

Operational Data:

Work area must be well ventilated to conform with OSHA standards. Open can slowly to relieve any pressure build-up, and close lid tightly after each use. Do not allow stripper to remain open over long periods of time. Do not use on rubber, plastic parts/surfaces, tile, linoleum, and fabrics/upholstery. Mask areas to avoid remover entering unwanted areas such as seams, trim, etc.

To Apply:

Test small area first for desired results, then work one section of fiberglass at a time. Using a brush, apply remover in one direction using thin coats since heavy or thick coats may cause old finish to run into unwanted areas. Allow remover to remain on painted surface for 3-5 minutes. Do not allow remover to remain on fiberglass surface longer than 5 minutes or damage could result on fiberglass surface.

On vertical surfaces it is recommended to start brushing from the bottom of the panel and work upwards. Using different size brushes will make the job easier. Remove by using a damp cloth or plastic scraper and pushing stripped material off fiberglass surface. A second thin coat may be required on areas missed by the first application. Use a sander with 80-100 grit sandpaper to remove stubborn spots. Surface can be water washed. Cleaned surface must be dried before proceeding with directions on refinishing products.

CMA's Fiberglass Paint & Coatings Remover should be used when the temperatures are between 65-90F and away from strong breezes and direct sunlight for best results. Once opened, stripper should be used within six months or discard to avoid can deterioration. Empty cans should not be refilled and discarded in accordance with local, state, and federal laws.
